

Background

Mr. Letson's strengths include a tenacity and persistence to follow a project from concept to completion, insuring that all work is done correctly and in a very professional manner. He thrives in a team atmosphere, which incorporates all members' ideas and opinions, ultimately reaching common goals, while producing the best possible solution for projects.

It is his passion for creating that drives him in the landscape architecture profession. He believes there is great reward in being able to enhance a place by combining technical and artistic skills with horticulture knowledge. The skills that he has developed over his career, especially in the design process and horticulture make him a creditable designer.
